

Face Mask Packaging Machine

Face mask packaging machine is mainly used to pack four-side sealing packaging products, such as face mask, plaster paste, anti-heat paste, warm baby warm paste, non-woven sheet, dressing paste, disposable paper-plastic inspection gloves, gauze block, medical application, mask, medical surgical gloves, electrode sheet etc.

Features:

1. Machine is stable in operation, convenient in operation and complete in function.
2. It has the advantages of precise film feeding, stable conveying of materials and precise bag cutting.

Process flow:

Face mask loading on the conveyor belt → face mask into the bag → Four side sealing bag → Cutting → Product delivery

Main technical data:

Name: Face Mask Packaging Machine

Model: PPD-FMP

Bag size: length 90-180 mm × width 60-130mm option

Processing capacity: 80-120 bags / min

Packaging film material: paper aluminum, paper plastic, aluminum plastic, aluminized film and other packaging materials, $\Phi \leq 350\text{mm}$, width $\leq 500\text{mm}$

Applicable packaging: plaster paste, antipyretic paste, warm baby warm paste, non-woven sheet, dressing paste, disposable paper and plastic inspection gloves, gauze blocks, medical application, masks, medical surgical gloves, electrode sheets and other products.

Total power: motor 2.2KW heating 3.3KW

Voltage:220v 50Hz

Machine weight: 800 kg

Machine dimensions: 500 × 1300 × 1600mm (LxWxH)

NOTE:Any different size can be customized.
